

Providing innovative, trusted support to ambitious, forward looking businesses remains at the heart of Grant Thornton's work. But running throughout this is a wider purpose and that is to create a more progressive and productive economy across the East of England and UK as a whole.

Our country is at a pivotal point and at this stage we can only speculate over what the post Brexit landscape will look like. However, one thing we do know is that we now have a huge opportunity to build a positive future and a society that benefits all – a task which Government cannot and should not do alone.

Businesses and other organisations have a major role to play and at Grant Thornton we are leading the charge.

Over the past 18 months, our nationwide 'Vibrant Economy' campaign has brought together businesses, cities and communities to discuss ideas and actions that will help take the local, regional and national economy to the next level, and much progress has been made towards this goal.

Supporting growth

As local, national and global markets change, so do the opportunities and challenges businesses face. Dynamic organisations need a broad range of services to support their growth ambitions and our collaborative approach means we can draw on the expertise of a multidisciplinary team to provide specialist, tailored advice.

Grant Thornton's award winning regional Corporate Finance team is just part of our market leading Advisory offering, providing expert guidance across a range of areas including transactions, pensions, wealth advisory, reorganisation and risk.

Integrity, reliability and quality are three words which underpin all our work, whether that's offering specialist Tax advice to help clients navigate their way through an increasingly complex system, or providing first class, value for money technical solutions through our Audit and Assurance team.

Award winning service from an award winning firm

Our work has been recognised at both regional and national level having taken the title of Accountancy Firm of the Year (for larger clients) at the 2016 FDs' Excellence Awards for the second year running and International Firm of the Year 2017 at the British Accountancy Awards.

We have also been recognised for our significant action to improve social mobility in the workplace. In what is believed to be the world's first-ever Social Mobility Employer Index, the firm ranks first out of the Top 50 employers who have taken the most action to improve social mobility in the workplace.

As you can see, at Grant Thornton we are more than just another accountancy firm.
